Linkedin:	uk.linkedin.com/in/tobiashale	Portfolio:	ThatTobMate.com

I have always had a desire to create websites and applications so to help achieve my goals I decided to take the plunge and enrol in the intensive web development course at General Assembly in London. I have achieved all my goals on the course and now I want to continue developing and learning more. During the course we learnt various languages like Ruby and Javascript. I really enjoyed playing with the AngularJS framework and decided to build my final project mainly using Angular in combination with Rails.

I am really passionate about being a developer and GA saw this and I was offered the role as a teaching assistant after mine. I am currently teaching on my second course and will be looking for full-time employment from April.

I also studied Sports Rehabilitation and Injury Prevention at Middlesex University and achieved a Diploma of Higher Education. I am an outgoing, ambitious and friendly person who enjoys meeting new people. I am a sports enthusiast, football is my passion and I also like golf, tennis, NFL and racing.

Professional Experiences

Teaching Assistant at General Assembly

September 2014 – Present

Web Development Immersive

Produce lesson plans and deliver lessons as part of the GA Web Development Immersive course. Provide in class assistance to students, assess homework produced and provide one to one tuition.

Web Development Immersive student at General Assembly

June 2014 – September 2014

12 week Intensive Web Development Course. Worked with a wide range of languages and learnt the how to build modern Web Apps. The primary focus of the course was Ruby on Rails and Javascript. I learnt how to think and code as a developer having no previous experience in coding of any kind. I built my final project using mostly AngularJS with Rails for the back-end. We only briefly covered AngularJS for a couple of days before I started my final project, so it was very new to me. The course taught me so much and I was given a role as Teaching Assistant for the course that started after mine. *(Feel free to have a look at my github for other projects)*

Part-time Home Care Worker

Interests and Hobbies:

I am a sports enthusiast; I am passionate about football and also enjoy playing Tennis, Golf and American Football. I am a member of The Burstead Golf Club in Little Burstead. I'm very interested in technology and enjoy keeping up with the latest trends and am an active member of the LRUG community. I have a desire to learn how to code native mobile applications at some point. I am a fast learner when it comes to using new computer software and hardware. I enjoy problem solving and if I come across any problems on a computer I enjoy trying to fix it. I also enjoy socialising and meeting new people.
